

## FP1124-3 HT Pressure Transducer

- Easy installation
- Built-in amplifier
- With bleeder screw
- Rugged construction
- High temperature

### DESCRIPTION

The FP1124-3 HT Series of pressure transducers is designed specifically to measure pressure on the brake circuit, including ABS brake systems.

With its rugged design and excellent thermal characteristics, the FP1124-3 is built to withstand high temperatures to fit most brake test applications. Additional IP67 protection and a bleeder screw ensure ease of use and long life even under severe environmental conditions. The sensor can be powered by a car battery and delivers direct high-level 0.5 to 5.5 Vdc output signal.

Measurement Specialties, Inc. have many years of experience as a designer and manufacturer of sensing solutions to the automotive industry and can supply standard or custom sensors for specific uses and testing environments.

Consult Measurement Specialties, Inc. Engineering Department for a custom solution to your application.
